

206.5 - On-Wafer Calibration Artifacts

RM 8130 is an on-wafer calibration artifact for microwave scattering parameters.

PLEASE NOTE: The tables are presented to facilitate comparisons among a family of materials to help customers select the best SRM for their needs. For specific values and uncertainties, the certificate is the only official source.

SRM	Description	Unit Size
8130	Coplanar Waveguide Calibration Set	each

- Certified values are normal font
- Reference values are italicized
